FOR 2015+ FLTR

1. Loosen, but do not remove, the four windshield mounting screws and gently remove your windshield

2. Ensure the washers on each mounting screw are out toward the head of the screws

3. Install your new Flare™ Windshield onto the mounting screws. Torque the two center screws first, then the two outer screws.

FOR 98-13 FLTR

1. Remove all five windshield fasteners and remove your windshield

2. Check the well-nuts in the fairing, if they are damaged or broken, Klock Werks offers a replacement kit (part number 2404-0548) for \$29.95

3. Starting with the center screw, install your new Flare™ Windshield and torque to factory specifications.

NOTE Reinstallation of the stock weather stripping is not required

Klock Werks cannot be held responsible for any damage resulting from improper installation performed by any consumer or their dealer.

FLARE™ NUTS FOR 98-13 FLTR

Factory well-nuts are prone to failure after a few uses. Klock Werks Flare™ Nuts are manufactured out of a superior material and have a revolutionary design, including a metal washer molded into the flange to prevent the well-nut from pushing through the windshield mounting hole and ending up inside your fairing. In addition, we've added a superior brass threaded insert that tightens the well-nut, but allows for continuous installation and removal.

- // The best replacement well-nut for your Road Glide.
- // Shoulder molded on to brass insert to prevent pull through
- // Metal washer molded into flange to prevent well-nut from pushing through fairing
