#### NOTE:

Always refer to model appropriate service manual for procedures and torque specifications

#### QUESTIONS?

#### EMAIL:

info@getklocked.com

CALL: (605) 996.3700

1. Prepare the under-side of your saddlebags by roughing up the contact patch between the saddlebag and the extension
2. Using 3M Superfast Plastic Repair (part number 04247) coat the contact patch evenly and place the extension onto the saddlebag (FIG 1 & 2)

NOTE: The adhesive listed above bonds in 1 minute. If you need more time, use an adhesive with a longer working time. You may decide to use hardware to attach the extension to the bag as shown in Fig 2.

3. In 30 minutes, the saddlebag will be ready to start filling and smoothing
4. Let the bonding agents and fillers cure properly and then they are ready for paint! (FIG 3)
